

# Sanction Screening

- Stop penalties, reputational damage & business disruptions.
- Automate payment compliance.
- Protect your business.

## Integrate seamlessly with existing payment processes

For international trading companies, payment processors and export and import businesses among others Nomentia Sanctions Screening provides a seamless, automated tool to ensure compliance and maintain access to global markets.

## Key features: Why Sanction Screening?

**Automated payment screening**

Automatically check payments against selected public sanctions lists.

**Flagging and alerts**

Identify and flag payments to sanctioned entities, alerting the user for further review.

**False positive management**

Increase operational efficiency and reduce unnecessary alerts.

**Continuous monitoring**

Automatically check payments against selected public sanctions lists.

**Easy integration with existing systems**

Identify and flag payments to sanctioned entities, alerting the user for further review.

**Advanced algorithm**

Increase operational efficiency and reduce unnecessary alerts.

## Key benefits: Sanction Screening

**Guarantee compliance**

Comply with international regulations, avoid severe penalties and legal consequences.

**Build seamless due diligence**

Establish a thorough due diligence process for customers and ensure compliance during onboarding and throughout ongoing transactions.

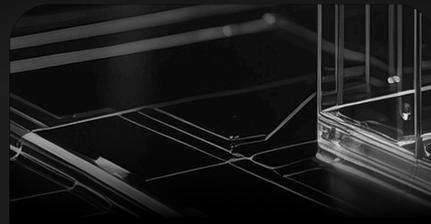

**Protect business reputation**

Prevent negative publicity and potential damage to brand reputation due to sanctions violations.

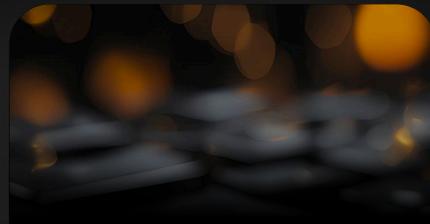

**Improve operational efficiency**

Reduce the need for manual screening, save time and resources while improving the accuracy of compliance efforts.

**Minimize financial risk**

Mitigate the risk of fines, legal fees, and other costs associated with sanctions violations.

**Maintains market access**

Protect businesses from being excluded from markets or contract opportunities due to non-compliance.
